## About PILS 2008

**Polymers in Life Sciences (PILS)** was established in 2004. Its main aim is to connect researchers from **all fields of polymer science relevant to life sciences**. Topics include, but are not limited to biodegradable polymers, polymers for drug delivery, biophysics, implants, diagnostics, genetically engineered polymers, and polymers in food and cosmetics.

The long-term goal is to foster further contacts between researchers in all fields relevant to the topic and to establish PILS as a leading platform for showcasing new developments in the field.

## Posters & Contributed Talks

There is a limited number of slots for contributed talks (15 + 5 min). If too many talks are applied for, the scientific committee will select talks & posters. Poster and talk abstracts (one page) should be submitted via email to [pils2008@unibas.ch](mailto:pils2008@unibas.ch).

The **poster prize** is sponsored by **WILEY-VCH** and **Macromolecular Bioscience**.

## Displays & Table Tops

An opportunity to present your company (company profile, displays, product brochures, job postings, ...) is available upon request. For more information please contact the Symposium Office.
